

59-5356C-xx-TB Wiring Harness for 105F1-1 Paragon Flame Scanner

Description

Fireeye offers the 59-535C and 59-536C cables pre-wired with the female quick disconnects for use with the Paragon flame scanners. The 59-535C cable is a twelve (12) conductor cable and the 59-536C is an eight (8) conductor cable. Fireeye offer a wiring harness complete with pre-wired cables and connectors, flexible conduit and a 60-2862 terminal box.

See bulletin CU-108 for detailed scanner wiring connections.

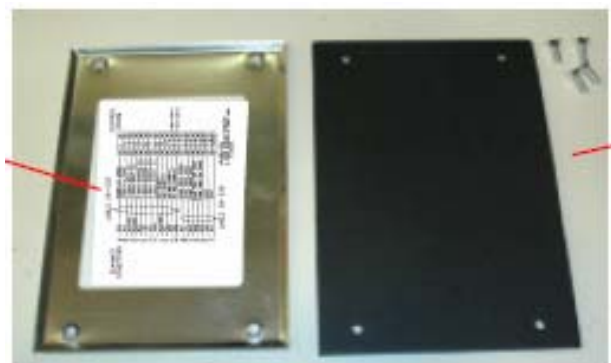

Using Wiring Harness

To provide an easy method to wire the Paragon Scanners, Fireeye offers a wiring harness in five different lengths (10', 20', 35', 40' and 50'). The harness has two pre-wired female quick disconnects to plug into the male quick disconnects on the Paragon scanner. The other end of the wiring harness has a conduit box with a 1 to 20 connector terminal strip. See picture 1 below:
