

Fireye® Primeline School

In 2010 Fireye will offer two professional training classes for burner/boiler service and engineering personnel.

These classes use pertinent case histories and step-by-step instruction for servicing the complete line of Fireye controls. Our skilled instructors have many years of experience in the boiler industry and are experts on the various flame safeguard control systems.

For additional Fireye Product Training Schools, we recommend contacting your local Fireye Field Office or Fireye Primeline Distributor for dates and programs of schools specific to your application needs.

Fireye training classes are also listed on www.fireye.com. Click on “*Training Schools*” for more information.
